

Press Release

Data Migration is listed in 2015 Gartner Magic Quadrant "Structured Data Archiving and Application Retirement"

Kreuzlingen, 15. June 2015. Data Migration AG (www.data-migration.ch), a leading supplier of Enterprise Information Management software in the migration and historization fields, is proud to be listed again in the „Magic Quadrant for Structured Data Archiving and Application Retirement“ (SDAAR) by Gartner – the world's leading information technology research and advisory company for its software JiVS.

The 16 June 2015 Gartner Magic Quadrant lists 13 international software suppliers and shows the latest trends and developments on the SDAAR market.

"I am happy to be listed again in the Magic Quadrant! I believe it's a big step in the right direction. Especially considering that Gartner has very strict admission criteria, I feel this inclusion is a manifestation of quality and recognition", says Tobias Eberle, CEO of Data Migration AG.

"With our solution JiVS History we have a highly efficient solution in the application retirement area for the replacement of SAP and other standard systems to offer to our clients. Because many standard interfaces and specifications are already available 'out of the box'", adds Tobias Eberle. "Further more, we could already prove with our numerous successful projects for international large accounts that JiVS as a strategic application retirement platform also works sustainably well for the replacement of extremely heterogeneous legacy system environments. We are happy our cloud offering for JiVS has been so well accepted from the market."

Operation costs could be reduced with JiVS - compared to a continued operation of legacy systems - by more than 80 percent. This enables clients to manage their unstructured and structured data in a unique cost-effective way and to use it over many years with the best possible TCO. Which is a contrast to many other supplies that are consistently too expensive in operation and too inflexible for users and in

its actual field of use. With several hundred discontinued systems due to the use of JiVS History, Data Migration AG is market leader for large enterprises and international corporations. Reference clients are companies like Alstom, SABMiller or Deutsche Telekom.

Data Migration AG

Data Migration AG, based in Kreuzlingen, has been assisting companies to safely manage and transform their change-related data since 1996. The company's core business is the JiVS platform with which clients can manage the whole lifecycle of corporate data in a platform- and application-independent manner. JiVS platform services range from migration, historization and deployment of data and information. Numerous clients like SBB, ABB, Alstom, Commerzbank or Deutsche Telekom benefit from cost-effectiveness, increased flexibility and agility – especially with historization projects and the subsequent closure of legacy systems.
