

## *JiVS & KPI Analyzer Solution Bundle*

# **JiVS & WEST TRAX: SYSTEMS AT THE READY FOR SAP S/4HANA**

Data Migration International and West Trax have joined forces to give your business the best possible start on your journey to SAP S/4HANA. Their joint solution bundle, comprising the JiVS Information Management Platform (JiVS IMP) and the West Trax KPI Analyzer, prepares your IT environment for a successful migration to SAP S/4HANA – working in tandem to drive the maximum value from your SAP investments.

**The West Trax KPI Analyzer** is an automated quality audit app, designed to assess your company's usage of SAP systems across a range of key performance indicators (KPIs) – all in a single day. Aimed at companies readying their IT infrastructures for the integration of advanced technologies, the fact-based KPI Analyzer provides complete transparency into the maturity level and future readiness of your SAP systems.

Companies running SAP systems that meet the audit's quality criteria have the added advantage of being certified with the West Trax Quality Award – and ranked in the West Trax Analyst Ranking of High Performers within their relevant industry. The KPI Analyzer also comes with West Trax's Data and Storage Savings Calculator, which shows clients the potential gains of separating operational and historical data – a key efficiency driver powered by the JiVS Information Management Platform (JiVS IMP).

**JiVS IMP** offers a uniquely fast and streamlined approach to data migration, making application retirement far simpler and more cost-effective. This reduces the volume of data to be migrated to SAP S/4HANA by up to 95%, dramatically lowering operating costs and driving up data quality. Securely managing the entire lifecycle of legacy data and documents as part of the new IT environment, the JiVS platform ensures 100% legal compliance and data accessibility.

## Joint Value Proposition

Together JiVS IMP and the West Trax KPI Analyzer make a powerful combination. Key benefits include:

- Quality audit providing fact-based recommendations based on system KPIs for:
  - o Maturity level
  - o Usage quality
  - o Cost-effectiveness of usage and data
  - o Indication of license cost savings
  - o Risk mitigation and project cost reduction
  - o Industry comparison and individual ranking
- Acceleration and simplification of your digital transformation
- Significantly lower costs and effort:
  - o 50% less effort for data migration
  - o 25% reduction in TCO
  - o 80% reduction in operational costs

“We successfully completed our 'EHP8 Update to HANA' project last year and have been live since December 20, 2020. The West Trax KPI Analyzer was a great help, especially with test validation. The app helped us to analyze our system usage, to coordinate Z-code customization – and of course to benchmark our application. Now, when there's a new download from our system, we can use the KPI Analyzer to evaluate the targets we set ourselves. Our project documentation reflects the full story and we can provide a clear picture of the before and after.”

**Hartmut Schröder**

**Head of IT**

**DE-VAU-GE**

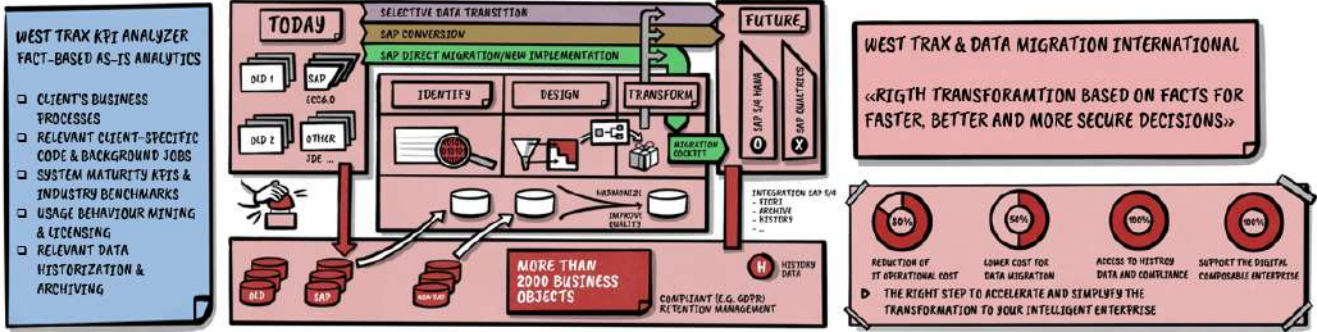

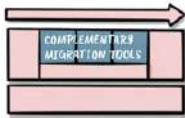

“Jivs allowed us and is still allowing us to simplify our application portfolio, reducing our infrastructure footprint and energy consumption while achieving great savings and keeping customer satisfaction.”

**Stéphane Battesti**

**Senior IT Project Manager**

**GE Corporate**

# COMBINE FACT-BASED ANALYSIS WITH THE RIGHTFIELD APPROACH - POWERED BY WEST TRAX AND JIVS IMP
