

**USE CASE:**

S/4HANA Transformation

**INDUSTRY:**

Industrial Manufacturing

**COUNTRY:**

Switzerland

## DATA MIGRATION IN JUST 3 MONTHS: HAWLE GOES LIVE WITH SAP S/4HANA AS PLANNED

When migrating to SAP S/4HANA, many companies find that migrating and transforming legacy data is more complicated and time-consuming than expected and exceeds planned time and cost schedules. In addition, incomplete, erroneous, and duplicate data sets have accumulated over many years, diminishing the benefits of SAP's latest software generation. Hawle Armaturen AG, a leading Swiss production and trading company in the water, gas, and wastewater sectors, also had to overcome these challenges when implementing SAP S/4HANA and migrating from the legacy system of a third-party manufacturer. This was achieved with the One-Click Transformation approach from Swiss provider Data Migration International.

**"When we signed the contracts, we were like, 'If you can do it, do it!' What can I say? DMI can. After just three months, we had completed the data migration and transformation project to SAP S/4HANA."**

**Marc Veraguth**  
Head of ICT  
Hawle Armaturen AG

### SITUATION

- Existing ERP Swiss Axis used at 5 companies will be replaced with a modern and single SAP S/4HANA solution
- Only needed data will be migrated to the new SAP S/4HANA system
- First approach to migrate data from Swiss Axis to SAP S/4HANA based on scripts
- Impossible to meet project timelines with this migration approach
- Access to data which have not been migrated is needed for business and legal reasons

### SOLUTION

- Selection of One Click approach powered by JiVS IMP on December 2021
- Migration of master data and selected documents
- Automated export of data from Swiss Axis in an extremely short time with JiVS IMP
- Creation of Business Objects for 10 data migration objects and mapping to SAP S/4 HANA target structure data model
- Provision of data to the SAP Migration Cockpit
- Historization of the legacy system after migration powered by JiVS IMP

### BENEFITS

**Met extremely short timeline of 3 months for the migration of data from Swiss Axis to SAP S/4HANA**

**De-facto zero engagement for the data export from Swiss Axis required**

**Better data quality through validation of data and loading via SAP Migration Cockpit**

**Historization of old legacy systems and maintained access to all historical data available**
