

**USE CASE:**

Carve-out and
Application Retirement

INDUSTRY:

Fibre-optic network

COUNTRY:

Germany

CARVE-OUT AND APPLICATION RETIREMENT WITH JiVS

GasLINE has a fiber-optic cable (FOC) network covering the whole of Germany with over 10,000 km of cables. Over 100 national and international telecommunication companies already rely on and use the GasLINE network, which is connected, in over 100 cities, to call centers, PoPs (points of presence) and service providers. The network is continually expanding in line with customer-specific requirements. GasLINE is extending its product range and, alongside dark fibers, our future offerings will include Carrier Ethernet and wavelength services with flexible carrying capacities of up to 100Gbit/s – for powerful network solutions.

“It was an enormous challenge to achieve these objectives with one single solution”

Mr. Erbe

Project Manager for Data Transfer,
OGE

“Part of DMI's remit was to extract data from the previous service provider and to guarantee that this data was complete. This made our work and the whole project so much easier.”

Mr. Miodek

Project Manager, OGE

SITUATION

- With the change of the accounting provider, records have been taken over simplified, and without filmed document content
- To ensure long-term access to this content, an archiving solution for SAP has been evaluated
- In addition to internal research needs from GasLINE the solution is also in the focus of the GoBS

SOLUTION

- Target: Solution must meet the legal requirements, support internal processes, and have the lowest possible total cost of ownership (TCO)
- Capture the data from the previous service provider and to guarantee the completeness
- The JiVS platform covers all objectives and requirements
- Start with a Solution Assessment to take into account all aspects and subsequently perform the implementation

BENEFITS

GasLINE recherché now at a fraction of the cost and have fast access to all the required legacy data

The users need to search no longer in multiple systems and across companies' platforms - the ergonomics is significantly improved

The costs for an expanded SAP main system were able to be avoided

Thanks JiVS the use of the required long-term data is simplified and ensures an optimized TCO
